

Nullarbor
COUCHTM

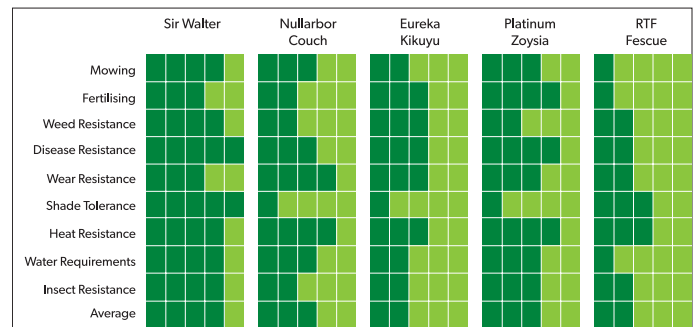

Selected by Lawn Solutions Australia as the very best performing couch for your home lawn, sporting surface or commercial project. Nullarbor Couch is the couch variety that is best suited to your region and is the perfect choice in couch grass.

HERE'S WHY:

- **It provides a good dense cover**
- **It has a fine leaf blade & dark green colour**
- **It has strong horizontal growth habit that makes it tolerant of low mowing**
- **It has low dormancy which means it has an early start to growth after winter**
- **It has a rapid recovery from wear and other stresses**
- **It has good tolerance of broadleaf herbicides for weed control**
- **Excellent wear tolerance**

BACKED BY LAWN SOLUTIONS AUSTRALIA

Nullarbor Couch is your perfect choice to produce a manicured lawn that stands out. Nullarbor Couch will give long lasting performance in full sun areas.

Nullarbor Couch is widely used as it makes a good environmentally friendly surface for your yard, playing field or parkland area when frequently mowed every 5-7 days in summer.

Nullarbor Couch produces a very dense turf that is an attractive luscious green colour. Nullarbor Couch has been researched, evaluated and trialed for the past 20 years.

Nullarbor Couch grows best in full sun, and requires at least 5-6 hrs of sunlight per day. Apply Lawn Solutions Australia recommended fertiliser 2-3 times per year to maintain a dense vigorous turf sward. Otherwise, Nullarbor Couch maintenance requirements (pests, diseases, etc.) are relatively low. It is best mown at about 15-25 mm height.

Nullarbor Couch is the perfect choice for work, rest and play.
